

**JOURNAL OF  
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,  
Silver Street, Cambridge, CB3 9EW England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,  
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,  
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,  
University of California, La Jolla, California 92037, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW1 2DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price of a volume (which includes postage) is £16.00 net (US \$52.00 in the U.S.A. and Canada). Single parts cost £7.00 net (US \$21.00 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

# CONTENTS TO VOLUME 10

## PART 1 AUGUST 1973

Penetration of high-frequency waves into a weakly inhomogenous magnetized plasma at oblique incidence and their transformation to Bernstein modes. J. PREINHAELTER and V. KOPECKÝ	page 1
Structural determination of electric field conditions in ionizing shock waves. B. P. LEONARD	13
Transverse ionizing MHD detonation waves. Part 1. Structure, Hugoniot curves and Chapman-Jouguet limit. SHIMSHON FRANKENTHAL, ALLAN B. FRIEDLAND and SAUL ABARBANEL	53
Transverse ionizing MHD detonation waves. Part 2. Numerical stimulation. ALLAN B. FRIEDLAND and SHIMSHON FRANKENTHAL	89
Negative temperature states for the two-dimensional guiding-centre plasma. GLENN JOYCE and DAVID MONTGOMERY	107
Approximations to the plasma dispersion function. A. L. BRINCA	123
Anisotropy of turbulence in a collisionless shock. K. MURAOKA, E. L. MURRAY, J. W. M. PAUL and D. D. R. SUMMERS	135
Fast charged particle reactions in a plasma. KEITH A. BRUECKNER and HENRY BRYSK	141
Non-turbulent electric fields in soliton and shock-like structures in magnetized plasmas. C. W. MENDEL and T. P. WRIGHT	149
Interaction between three modes in a non-homogeneous plasma. C. MAROLI	165
Shock-wave structure in a fully ionized gas. C. S. LU and A. B. HUANG	171
Potential created by a test particle in one-, two- and three-dimensions in a flowing ion-electron plasma. P. CHENEVIER, J. M. DOLIQUE and H. PERÈS	185

## PART 2 OCTOBER 1973

Wave propagation in a moving plasma: motion and wave propagation normal to the magnetic field. D. N. SRIVASTAVA	197
Radiation and ionization by relativistic electron beams. G. BENFORD	203
A theory of amplitude modulation of quasi-monochromatic plasma wave. Y. H. ICHIKAWA, T. SUZUKI and B. D. FRIED	219
On a family of exact nonlinear waves in plasmas. S. GOLDSTEIN and Y. SALU	231
Magnetoplasma equilibria with planar symmetry. T. YEH	237

Electromagnetic instabilities in non-uniform anisotropic plasmas. B. BUTI and G. S. LAKHINA	page 249
Mutual influence between two spherical conducting grids in a warm isotropic plasma. J. M. CHASSERIAUX and D. ODERO	265
On the stability of nonlinear cold plasma waves. Part 2. E. INFELD and G. ROWLANDS	293
Stability of isothermal magnetohydrodynamic shock waves. N. BEL and C. LAURY-MICOULAUT	301
Ambipolar diffusion as a singular perturbation problem. M. J. GILES	317

### PART 3 DECEMBER 1973

The anomalous skin effect in cylindrical plasmas. M. A. BLEVIN, J. M. GREENE, D. L. JOLLY and R. G. STORER	337
Anomalous skin effect for a plasma column in a magnetic field. R. G. STORER and C. MEANEY	349
The effect of gradients of density and static magnetic field on the propagation of surface waves and on wave-beam interaction. V. V. DEMCHENKO, N. M. EL-SIRAGY and A. M. HUSSEIN	359
Mutual impedance of two small dipoles in warm streaming plasma to measure Cherenkov cone of plasma waves. V. FIALA	371
On the perturbation of a plasma and a particle collection by a cylinder in a magnetic field. J. P. LAFON	383
Unified geometric and analytical treatment of magnetogasdynamic shocks. Part 2. The shock polars. L. A. BERTRAM	397
<i>H</i> theorem and kinetic equations for a reacting gas. TA-MING FANG	425
Growth of ambipolar field in a toroidal plasma. T. E. STRINGER	433
Ion rarefaction waves in cylindrical and spherical geometries. P. D. PREWETT and J. E. ALLEN	451
On the stability of nonlinear magneto-sonic waves in a collisionless plasma. V. V. DEMCHENKO and A. M. HUSSEIN	459
INDEX TO VOLUME	469
